# SUBJECT INDEX

Algebraic modelling
The algebraic modelling of chemical structures: on the development of three-dimensional molecular descriptors, 65
Aminobutanol
Intramolecular hydrogen bonding in 2-aminoethanol, 3-aminopropanol and 4-aminobutanol, 189
Aminoethanol
Intramolecular hydrogen bonding in 2-aminoethanol, 3-aminopropanol and 4-aminobutanol, 189
Aminopropanol
Intramolecular hydrogen bonding in 2-aminoethanol, 3-aminopropanol and 4-aminobutanol, 189

Basis set superposition error
Second quantization and exchange perturbation theory for intermolecular interactions. The basis set superposition error problem, 51
Benzophenone derivatives
Static second-order polarizabilities of aminobenzophenones and nitrobenzophenones, 79
Biphenyl congeners
Rotational barriers for selected polyfluorobiphenyl (PFB), polychlorobiphenyl (PCB) and polybromobiphenyl (PBB) congeners, 133

Carbon suboxides
Novel carbon suboxides and subsulphides ($C_5O_2$, $C_5S_2$, $C_4O_2$ and $C_2S_2$): assignment of UV and IR spectra by quantum chemical calculations, 147
Carbon subsulphides
Novel carbon suboxides and subsulphides ($C_5O_2$, $C_5S_2$, $C_4O_2$ and $C_2S_2$): assignment of UV and IR spectra by quantum chemical calculations, 147
Carboxylic acid enols
Carboxylic acid enols from the hydration of ketenes: a theoretical investigation, 155

Chemical doping
Mechanism of stereospecific chlorination of polyene via prolonged chemical doping, 211
Chirality
On geometric measures of chirality, 1
Chirality forces and chiral discrimination, 13
Electron chirality, 17
Cyclodisiloxane derivatives
An ab initio study of simple 1,3-cyclodisiloxane derivatives, 123

Diazo compounds
Ab initio study on thermal dissociation of diazo compounds, 203
Dichroism
Single- and multi-photon circular and elliptical dichroism—the effects of permanent multipole moments and molecular structure, 23
Dyson-type boson mapping
Dyson-type boson mapping for the electron excitation problem in molecules, 43

Electron excitation
Dyson-type boson mapping for the electron excitation problem in molecules, 43
Empirical peptide modeling
On the use of conformationally dependent geometry trends from ab initio dipeptide and oligopeptide studies in empirical peptide modeling, 275

Fluoroethanol
A surface topological study of rigid rotor and fully optimized models of methanediol and fluoroethanol, 249

Garnier–Osguthorpe–Robson algorithm
Prediction of protein secondary structures using a combined method based on the recognition, Lim and Garnier–Osguthorpe–Robson algorithms, 321
Glyoxal
Theoretical analysis of torsional potential functions. Part II. The rotational isomer-

ization of glyoxal and related molecules, 239

Hydrogen–oxygen fuel cell
A refined theoretical investigation of the hydrogen-electrode processes of an alkaline hydrogen–oxygen fuel cell, 225

INDO study
An INDO study of environment effects of the dioxygen position of an oxymyoglobin model, 335

Lim algorithm
Prediction of protein secondary structures using a combined method based on the recognition, Lim and Garnier-Osguthorpe-Robson algorithms, 321

Methanediol
A surface topological study of rigid rotor and fully optimized models of methanediol and fluoroethanol, 249

Napthazarin
The symmetry group of labile intramolecularly hydrogen-bonded naphthazarin, 179

$NCS^-$ complexes
Studies of the linkage and bonding of triatomics in transition metal complexes. Part 2. $NCS^-$ complexes, 111

Oxymyoglobin
An INDO study of environment effects on the dioxygen position of an oxymyoglobin model, 337

Permanent moments
Single- and multi-photon circular and elliptical dichroism—the effects of permanent multipole moments and molecular structure, 23

Perturbation theory
Second quantization and exchange perturbation theory for intermolecular interactions. The basis set superposition error problem, 51

Polyene
Mechanism of stereospecific chlorination of polyene via prolonged chemical doping, 211

Ramachandran map
The utility of the four-dimensional Ramachandran map for the description of peptide conformations, 291

Reaction field model hamiltonian
The role of induction forces in infra-red matrix shifts: quantum chemical calculations with reaction field model hamiltonian, 97

Recognition algorithm,
Prediction of protein secondary structures using a combined method based on the recognition, Lim and Garnier–Osguthorpe–Robson algorithms, 321

Second-order polarizabilities
Static second-order polarizabilities of aminobenzophenones and nitrobenzophenones, 79

Three-dimensional molecular descriptors
The algebraic modelling of chemical structures: on the development of three-dimensional molecular descriptors, 65

Transition metal complexes
Studies of the linkage and bonding of triatomics in transition metal complexes. Part 2. $NCS^-$ complexes, 111
